

accessori per stufe e caminetti

stove & fireplace accessories

•f LaFerroTecnica

Nell'alta **Val Seriana**, nella **provincia di Bergamo**, già gli antichi Romani avevano installato centri di lavorazione del ferro proveniente dalle miniere locali, per la produzione di lance e scudi.

In questo distretto industriale, **dal 1980**, La Ferrotecnica ha raccolto l'eredità dei mastri ferrai nella propria produzione, collaborando con il tessuto sociale e tecnico locale, dove la dedizione al lavoro di qualità e la continua ricerca all'innovazione si affiancano virtuosamente.

In the upper **Val Seriana**, in the **province of Bergamo**, the ancient Romans had already installed ironworking centres for the production of lances and shields from the local mines. In this industrial district, **since 1980**, LaFerrotecnica has taken over the legacy of the master ironworkers in its own production, collaborating with the local social and technical fabric, where dedication to quality work and continuous research and innovation are virtuously combined.
